

SABIN PANT

Software Developer · System Design First · Full-Stack & Backend Architecture
sabinpant100@gmail.com · +977 9845943810 · [Linkedin](#) · [Github](#) · [Portfolio](#)

PROFESSIONAL SUMMARY

Most developers jump straight to code. I spend weeks before touching a keyboard. Before writing a single line, I define actors and their flows, design the database schema with proper indexing, identify edge cases race conditions, concurrency issues, data integrity failures and decide how to solve them upfront rather than discovering them in production.

Computing student at Islington College (affiliated with London Metropolitan University) with hands-on internship experience, five AWS certifications, and practical expertise in full-stack development using Node.js, NestJS, PostgreSQL with Prisma ORM. Possesses strong foundational knowledge in Core Java, including JSP, Servlets, DAO, and Filter classes.

WORK EXPERIENCE

Full-Stack Developer Intern

March 2026 – Present

Leaflet Digital Solutions, Kathmandu

- ▶ Building data-intensive systems with Node.js, Express, Next.js and PostgreSQL — responsible for both architecture decisions and implementation.
- ▶ Designing and securing API pipelines with JWT authentication and role-based access control across multi-tenant applications.
- ▶ Producing API documentation with Swagger, enabling clean handoffs and reducing integration time for frontend teams.

PROJECTS

MediLife — Hospital Management System [GitHub](#)

Java 21 · Jakarta EE · Apache Tomcat 10 · MySQL · Maven · JSP/JSTL · jBCrypt · Gson

- ▶ Built a full-featured hospital management platform under strict MVC architecture — covering patient registration, doctor approval workflows, appointment scheduling, billing, and medical records across three roles (Admin, Doctor, Patient).
- ▶ Engineered a dual booking flow: patient-initiated Quick Consult (direct booking) and Admin-assigned Request Appointment with rejection handling and reassignment logic — modelling real-world hospital triage workflows.
- ▶ Implemented secure BCrypt password hashing, session-based authentication with configurable timeout, admin approval workflow for doctor registrations with licence document review, and account lock/unlock with reason tracking.
- ▶ Designed a notification system triggered by booking, confirmation, completion, billing, and account events — plus financial reporting with CSV export, system logs, and broadcast announcements for admin oversight.

WealthWise — Dual-System Finance Manager & Digital Wallet [GitHub](#)

Next.js 14 · Node.js · Express · PostgreSQL · Prisma · Tailwind CSS · Cloudinary · Gemini AI

- Architected a two-application ecosystem: WealthWallet (digital wallet with P2P transfers) and WealthWise (budget tracking with AI spending analysis), communicating via secure OAuth-style token exchange with AES-256 encryption.
- Implemented tiered KYC verification with document upload, atomic database transactions with idempotency protection, and JWT authentication with HttpOnly cookies — designed for production not just demonstration.
- Built a role-based admin panel with real-time analytics dashboard and Gemini AI-powered spending insights, applying clean architecture with strict controller/service/validation separation throughout.

TECHNICAL SKILLS

Backend	Node.js, NestJS, Express.js, Java (JSP, Servlets, DAO, Filters, MVC), TypeScript, Python
Frontend	React, Next.js, Tailwind CSS, HTML5, CSS3, Bootstrap, JSP/JSTL
Databases	PostgreSQL, MySQL, MongoDB, Oracle, Prisma ORM, Redis
Architecture	System design, REST API design, JWT auth, role-based access control, event-driven patterns, BullMQ
Cloud & Infra	AWS (EC2, S3, Lambda), Docker, Vercel, Render, Cloudinary
Tools	Git, GitHub, Postman, Swagger, Figma, PowerBI, Maven
Soft Skills	System design before code, edge case analysis, documentation, fast learner, extreme attention to detail

EDUCATION

BSc (Hons) Computing / IT

2024 – Present

Islington College · London Metropolitan University, Kathmandu

Relevant coursework: Programming, Databases, Software Engineering, Networking & Operating Systems, Cloud & IoT (AWS)

CERTIFICATIONS

- AWS Academy Graduate – Cloud Foundations
- AWS Academy Graduate – Data Engineering
- AWS Academy Graduate – Machine Learning Foundations
- AWS Academy Graduate – Machine Learning for NLP
- AWS Academy Graduate – Generative AI Foundations
- UI/UX with Figma – Web Design & Prototyping · Islington College
